

VIPIN KUMAR

Gurugram, India

AWS Platform Owner & Engineering Manager | Multi-Cloud Platform Specialist

k.vipz88@gmail.com • linkedin.com/in/linked-vip-in • github.com/kvipz • vip-in-the-cloud.dev

EXECUTIVE SUMMARY

Platform engineering leader with 15 years of experience across AWS, Azure and the Kubernetes ecosystem. Currently own Fidelity International's enterprise AWS platform end to end – roadmap, delivery and operations for a secure-by-default, self-service multi-account landing zone – and lead a globally distributed engineering team. Consistent focus on platform-as-a-product thinking, developer experience and operational excellence. At Fidelity, have contributed across AWS and Azure Platform teams – from building governance frameworks and automation tooling to enabling engineering teams through training, inner source practices and ways of working. Experienced in product ownership at squad level, with a strong belief in DORA metrics, Lead delivery and self-service platform thinking. Stays hands-on with the code, champions AI-assisted engineering and docs-as-code, and continues to deepen Kubernetes expertise through hands-on cluster engineering. Advocate for modern engineering practices and a collaborative approach to platform enablement.

CORE COMPETENCIES

Platform Strategy & Leadership	Cloud Infrastructure & Operations	Engineering Enablement & Practices
- Platform Ownership: Roadmap, Delivery & Operations - Engineering Management & Distributed Team Leadership - Multi-Cloud Platform Engineering (AWS, Azure, Kubernetes) - Platform-as-a-Product Philosophy - Squad-Level Product Ownership - Team Transformation & Cultural Change	- AWS Landing Zones & Governed Account Vending - Security & Compliance as Code (ISO 27001, EU DORA) - Kubernetes Platform Operations & Ecosystem - Enterprise Monitoring Design & Implementation - Greenfield Cloud Architecture & Application Migration - Cloud Networking Architecture & Security - Continuous Delivery Pipeline Design	- DORA Metrics & Lead Delivery - Agile / Kanban & Extreme Programming - Developer Experience Optimisation - Inner Source & Knowledge Sharing - Docs-as-Code & AI-Assisted Engineering - Technical Mentoring & Coaching

KEY CAREER HIGHLIGHTS

- Platform Ownership & Leadership** – Own the enterprise AWS platform end to end and lead a globally distributed team; raised delivery throughput by ~50% by introducing flow measurement where none existed.
- EU Resilience Initiative** – Conceived and secured approval for a multi-region EU resilience initiative covering cyber-recovery continuity, reduced regional concentration risk and secure GenAI (Amazon Bedrock) access.
- Platform Transformation** – Led cultural and technical uplift of the AzureOps team from Storming to Norming (Tuckman's Model); established Ways of Working across 6 dimensions, drove migration from multi-repo to monorepo modular delivery of landing zones and improved platform and workload monitoring coverage – recognised by leadership.
- Operational Excellence** – Reduced proxy whitelisting turnaround time by ~87%; automated IP allocation with a Python CLI IPAM delivering 5x faster provisioning; implemented enterprise-wide cloud instance governance monitoring; designed global health dashboards improving incident response.
- Cost Optimisation** – Delivered multiple cost reduction initiatives including VGW log cost elimination, log retention optimisation and CodeBuild right-sizing; implemented Azure IoT Hub autoscaling achieving measurable operational savings.

PROFESSIONAL EXPERIENCE

AWS Platform Owner & Engineering Manager – AWSOps

Jul 2026 – Present

Fidelity International, Gurugram

- **Own the AWS platform end to end** – roadmap, delivery and operations across a large enterprise multi-account estate.
- **Lead a globally distributed engineering team** – hiring, coaching and career development across time zones.
- **Raised delivery throughput by ~50%** by introducing flow measurement, tightening reviews, cutting ad-hoc changes and moving pipeline runs to engineering pairs.
- **Conceived and secured approval for a multi-region EU resilience initiative** – cyber-recovery continuity, reduced regional concentration risk and secure GenAI (Amazon Bedrock) access.
- **Own the Terraform landing-zone codebase** – reusable account modules, a YAML configuration layer and Python tooling, delivered through AWS CodePipeline.
- **Co-own governance-gated account vending** with Security, Governance and Architecture: an approved ServiceNow request auto-raises a PR, and the pipeline provisions a baselined, network-connected account.
- **Deliver secure-by-default accounts through policy-as-code** – preventive SCP guardrails, automated remediation, Security Hub, GuardDuty and IAM Identity Center with permission boundaries.
- **Run hybrid networking** – Transit Gateway hub-and-spoke, Route 53 Resolver DNS, SD-WAN on-prem connectivity and a central egress proxy with SLA-backed allow-listing.
- **Platform lead for ISO 27001 and internal/external audits under EU DORA**; enforce change quality with automated checks, staged rollouts, two-person review, on-call and RCAs.
- **Champion AI-assisted engineering and docs-as-code**; own tagging standards with FinOps and support emerging platforms on architecture and operations.

Principal Engineer – AzureOps Team

Aug 2024 – Jul 2026

Fidelity International, Gurugram

- **Led Team Transformation initiative** establishing Ways of Working framework across 6 dimensions (Delivery, Engineering, Ceremonies, Support, Releases, Improvements), moving the team from Storming to Norming phase – recognised by leadership.
- **Delivered Workload Monitoring enhancement**: standardised, real-time service health alerting via Azure Functions and Azure Monitor to Email and Teams channels, providing customers actionable insights on Azure Service Health actions.
- **Drove Network Monitoring strategy**, leveraging AWS experience to implement monitoring solutions including Global Health Dashboard concepts adapted for the Azure Platform.
- **Automated IP Allocation process**, designing and implementing a scalable, customised Python-based CLI IPAM solution delivering 5x faster provisioning and eliminating manual workflows.
- **Embedded cloud governance through Azure Policy** for compliant-by-default environments.
- **Built three AI-powered assistants** using ChatGPT to accelerate engineering best-practice adoption, streamline agile ceremonies and enhance operational support.
- **Contributed to a regional SD-WAN migration** applying networking expertise in Private Endpoint architecture and connectivity patterns.

Principal Engineer – AWSOps Team

Dec 2022 – Aug 2024

Fidelity International, Gurugram

- **Co-led Proxy Whitelist Pipeline initiative** partnering with the team to carve out the first proxy pipeline from a monolithic pipeline, reducing turnaround time by ~87% – directly improving developer velocity.
- **Established Cloud Instance Governance Monitoring framework** collaborating with the ServiceNow team to build real-time, enterprise-wide reporting of AWS instances, providing visibility into running/stopped/terminated states with critical metadata (IP, Instance ID, Account ID).
- **Delivered Enterprise-wide Terraform training**, conducting a 3-day deep-dive training programme in Feb 2023, enabling 200+ engineers on IaC best practices and inner source module consumption.
- **Drove multiple cost optimisation initiatives** including VGW duplicated cost elimination, log retention balancing and CodeBuild compute right-sizing.

- **Architected network solutions**, dissecting and documenting the complex enterprise AWS networking layer (VPCs, Transit Gateway, Direct Connect); delivered internal knowledge-sharing sessions.
- **Enforced cloud security posture** via SCPs and Security Responder frameworks.
- **Built AWS TAM partnership**, establishing strong relationships with AWS account teams for platform optimisation and strategic guidance.
- **On-call support rotation** providing 24/7 platform reliability and incident response.

Distinguished Engineer – Platform Squad (Product Owner)

Aug 2021 – Dec 2022

Fidelity International, Gurugram

- **Served as Platform Product Owner** for an engineering squad with a bottom-up product roadmap across 4 dimensions, bridging gaps between application engineers and underlying platform infrastructure.
- **Led CI/CD modernisation initiative**, migrating pipelines from Jenkins to AWS CodePipeline, improving deployment automation and reducing pipeline complexity.
- **Built Inner Source modules** enabling workload teams to adopt Terraform automation patterns and accelerate delivery.
- **Embedded modern engineering practices** including pair programming, TDD and continuous delivery as daily team practices.

Associate Technical Specialist

Jan 2021 – Aug 2021

Barco Electronics Ltd, Noida

- Managed multi-cloud platform operations across Kubernetes, AWS and Azure for the centralised platform team.
- Contributed to EKS migration from self-managed Kubernetes, improving operational efficiency and reducing management overhead.
- Delivered Azure IoT Hub autoscaling solution using event-driven architecture (Azure Functions), achieving operational cost reduction.
- Implemented Terragrunt for Terraform refactoring, improving IaC modularity and reusability.
- Participated in weekly support rotation, identifying improvement areas and implementing operational fixes.

Tech Lead – Cloud Solution Architect

Dec 2019 – Jan 2021

Tech Mahindra Ltd, Noida

- Architected and executed on-premises to Azure cloud migration for AT&T BSS applications with defined SLAs (RPO/RTO).
- Delivered Azure Private Endpoint implementations for client networking during early product launch phase.
- Led enterprise Azure training and AZ-103 certification programme for organisation team members.
- Achieved 99.9% availability for mission-critical migrated workloads through fault-tolerant architecture design.
- Held dual role as Engineering Manager + Cloud Architect – hiring, goal-setting, architecture and client SLAs.

Design Architect

2019

HCL Technologies, Noida

- Designed fault-tolerant cloud architectures for public-facing applications across AWS and Azure.
- Built CI/CD pipelines using Jenkins and CloudFormation enabling continuous deployments.

Senior Engineer

2014 – 2019

Ericsson Global India, Noida

- Automated network KPI monitoring, increasing operational efficiency by 20% and reducing manual effort by 30%.
- Designed and maintained large-scale telecom network infrastructure and monitoring systems.

Assistant Manager – Network Operations

Oct 2010 – Dec 2014

Tata Teleservices Ltd, Delhi

- Enhanced network infrastructure monitoring through automation; delivered critical upgrades with zero service disruption.

TECHNICAL SKILLS

Cloud Platforms	AWS, Azure, Kubernetes
AWS Platform	AWS Organizations, Landing Zones, Account Vending, IAM Identity Center, Permission Boundaries, AWS CodePipeline, FinOps Tagging
Azure Platform	Azure Policy, Entra ID, RBAC, Key Vault, Azure Functions
Kubernetes	EKS, kubeadm, Flannel, Calico, NGINX Ingress, Istio, Helm, Kustomize
Infrastructure as Code	Terraform, Terragrunt, Inner-Source Modules
CI/CD & GitOps	Jenkins, CodePipeline, Azure DevOps, GitHub Actions
Programming	Python, Shell Scripting, PowerShell, Go (working knowledge), JavaScript (working knowledge)
Networking	VPC, Transit Gateway, Direct Connect, Route 53 Resolver, SD-WAN, Egress Proxy, Azure VWAN, ExpressRoute, Private Endpoint, Azure Firewall, Azure DNS, Application Gateway, Front Door, NSG
Monitoring & Observability	CloudWatch, Azure Monitor, Log Analytics Workspace, Application Insights, Grafana, Prometheus, ELK
Security & Compliance	Policy-as-Code, SCPs, Security Hub, GuardDuty, IAM, Azure AD / Entra ID, Azure Policy, Key Vault, RBAC, Security Groups, ISO 27001, EU DORA
Secret Management	Azure Key Vault, AWS Secrets Manager, HashiCorp Vault
Container Registry	Amazon ECR, Azure ACR
Ways of Working	Platform-as-a-Product, Developer Experience, DORA Metrics, Docs-as-Code, AI-Assisted Engineering, Agile / Kanban

CERTIFICATIONS

▪ Certified Kubernetes Administrator (CKA)	Apr 2026
▪ Microsoft Certified: Azure AI Fundamentals (AI-900)	Jan 2025
▪ AWS Certified Advanced Networking – Specialty (ANS-C01)	Jan 2023
▪ HashiCorp Certified: Terraform Associate (002)	Apr 2021
▪ Certified Kubernetes Application Developer (CKAD)	Nov 2020
▪ Microsoft Certified: Azure Solutions Architect Expert (AZ-303/304)	Feb 2020
▪ AWS Certified Solutions Architect – Associate (SAA-C01)	Nov 2017
▪ Ericsson Training & Certification Program (ETCP) – Radio Access Network	2016
▪ Ericsson Training & Certification Program (ETCP) – Radio Network Optimization	2015

EDUCATION & PROFESSIONAL DEVELOPMENT

▪ B.E., Electronics & Communication Engineering – Delhi College of Engineering , Delhi	2010
▪ National Level Certificate & Scholarship (NCERT) – National Talent Search Examination	2004
▪ Active Toastmaster and former Vice President Education – Toastmasters International, Corporate Club at Fidelity	

SIDE PROJECTS

- **Pairwise** – weekly pair-planning tool for platform engineering teams: generates support pairs, floats and engineering pairs that avoid recent repeats. vip-in-the-cloud.dev/pairwise
- **Toastmasters Club App** – meeting toolkit covering speaker lineup, evaluation forms, timer, ah-counter and grammarian roles. toastthemost.github.io
- **Team Culture Map** – interactive sliders to map how a team operates across 7 cultural dimensions. vip-in-the-cloud.dev/team-culture-map
- **Power-Interest Grid** – drag-and-drop stakeholder mapping tool for planning engagement strategy. vip-in-the-cloud.dev/power-interest-grid
- **First 90 Days** – interactive frameworks for situation assessment, STARS priorities, key conversations and team evaluation. vip-in-the-cloud.dev/first-90-days
